

Technical Data Sheet

NCCO PROTECT 2030

FAST DRYING PROTECTIVE COATING FOR STEEL & CONCRETE

Product Character

Color	Various colours available
Density at 25°C, g/ml	1.18 gm/cm ³
Adhesion	Excellent
Finish	Gloss
Solid content	55-70%

Product Description

NCCO PROTECT 2030 is a high-performance, fast-drying protective coating designed for both steel and concrete surfaces. The coating forms a tough, durable film that provides excellent resistance to weathering, moisture, chemicals, and corrosion while delivering long-term protection under harsh environmental conditions.

The product is suitable for industrial, marine, and construction applications requiring rapid drying and superior protective performance.

Application

- Structural Steel Protection
- Concrete Floors and Walls
- Industrial Facilities
- Storage Tanks
- Pipelines and Equipment
- Workshops and Warehouses
- Bridges and Steel Structures
- Marine and Coastal Environments

Storage and Handling

Use in well-ventilated areas. Avoid inhalation of vapors and prolonged contact with skin and eyes. Wear appropriate protective equipment during handling. Keep away from heat, sparks, and open flames.

Key Features & Benefits

- Fast drying and quick recoating.
- Excellent adhesion to steel and concrete substrates.
- Superior corrosion and moisture resistance.
- Outstanding weather and UV resistance.
- Excellent abrasion and impact resistance.
- Resistant to oils, dilute acids, alkalis, and industrial chemicals.
- Provides a durable and long-lasting protective barrier.
- Suitable for interior and exterior applications.

Shelf life

- Store in tightly closed containers
- Keep in a cool, dry, and well-ventilated area
- Protect from direct sunlight and heat sources
- **Shelf life: 12 months** under recommended storage conditions

Safety

- Flammable paint
- Use appropriate personal protective equipment (PPE)
- Refer to the Safety Data Sheet (SDS) for detailed safety information
